

OUR COMPANY

Onda Radio SLU is a firm specialized in meteorological, energy and communications fields, that offers its services all over the World.

Nowadays our company has turned into one of the main companies on the world that installs measurement and communication masts. We work on renewable energies and new technologies, always in a wide range of sectors.

By using a strong infrastructure and well qualified workmen we have made an important contribution to the development of most of wind farms Spain. We are able to undertake great projects like installation of wind and communication mast from 10m. to 145m. high in geographical points where is nearly impossible for cranes to access.

Onda Radio Torres SLU undertake, mainly three lines of work:

Meteorological: All services, from the installation of a wind mast till data processing and projects development.

Energy: Wind power and solar energy to domestic or industrial use.

Communications: Companies radio communication, organizations (e.g. police) and also demotic.

Due to the characteristics of the works we make and the risk they entail, Onda radio Torres SLU has a system of risks prevention at work helped by SPA, and recently has implanted the ISO 9001 IAC certity of quality.

OUR SERVICES

Onda Radio Torres SLU as a firm that works in the field of renewable energy bases its activity mainly on providing, installing and maintaining of measurement wind masts as well as: dismantling, moving, renting metrological mast, instrumental and equipment, instrumentation and equipment for wind measurement, collecting and data processing.

In Onda Radio Torres SLU we have a great experience in installations of wind mast all over the world. We adapt to the needs of each customer giving all kind of services from the supply of the different kind of wind masts to their installations, connection, start-up and maintenance. We ensure the perfect operation of all our installations.

In the same way we move and dismantle wind masts and we also offer the possibility of storage all the material and equipments of our customers in our warehouse.

We offer services of maintenance of meteorological masts making activities of equipment, collection and data processing.

OUR WORKS

In Onda Radio Torres SLU we offer our services in and out of our frontiers, making works even in difficult accessible land by using different equipment of help (helicopters, all-terrain vehicles..), always with standardized and approved materials and goods.
